
Taxonomy of switched networks

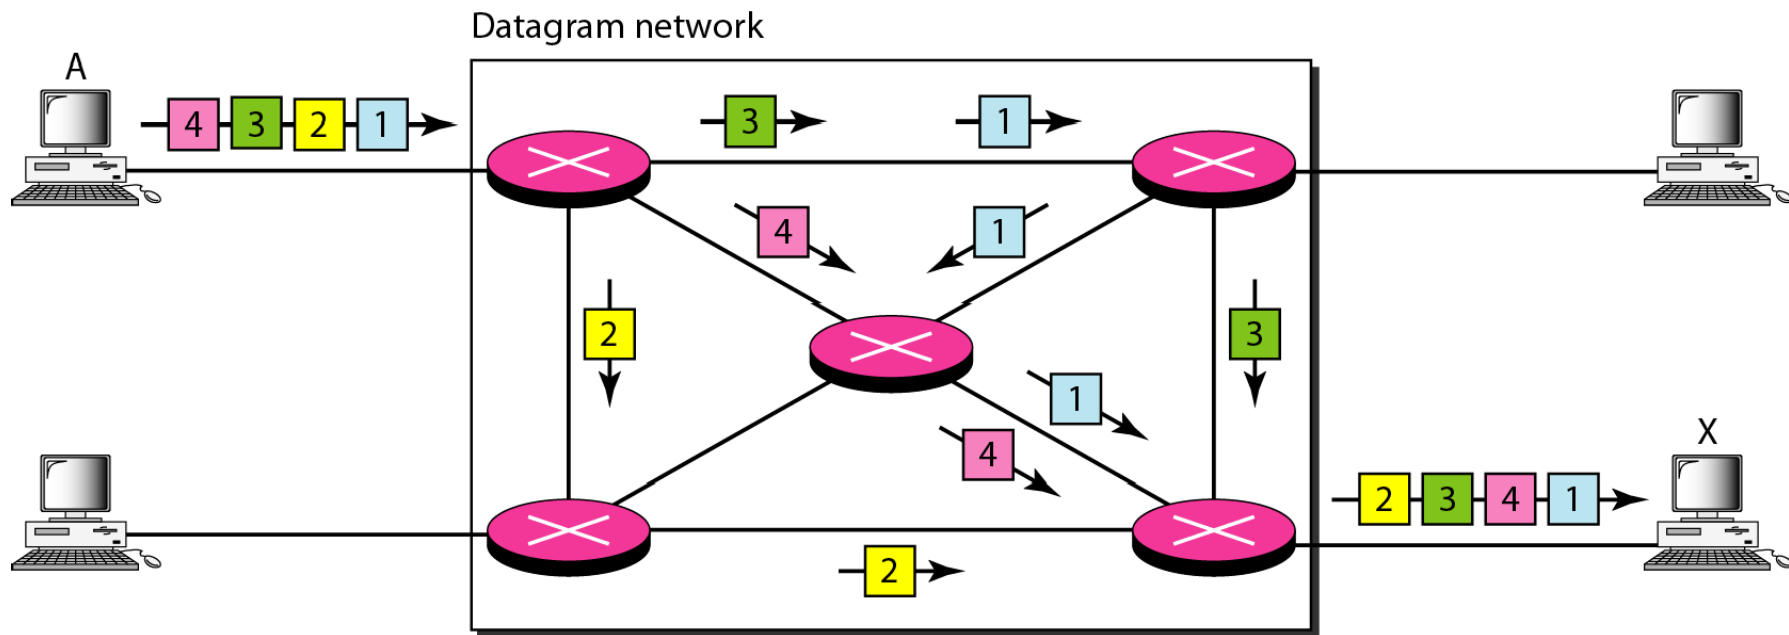

A trivial circuit-switched network

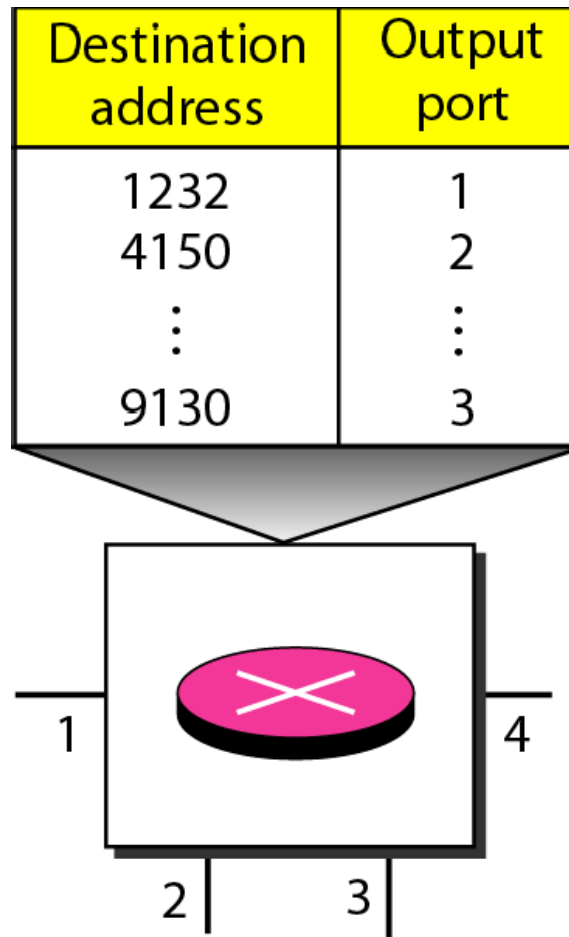

Delay in a circuit-switched network

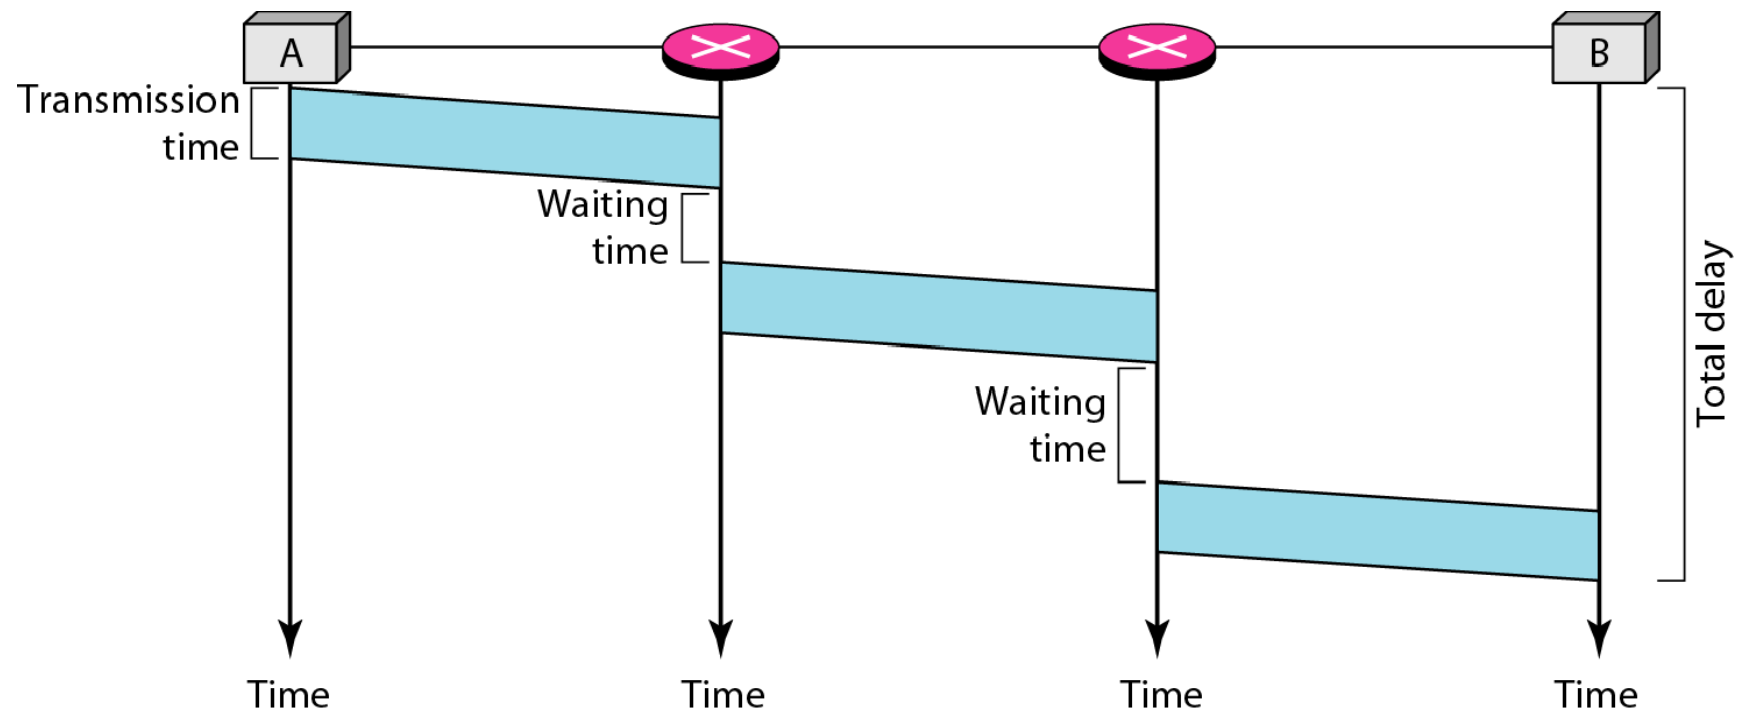

A datagram network with four switches (routers)

Routing table in a datagram network

Delay in a datagram network

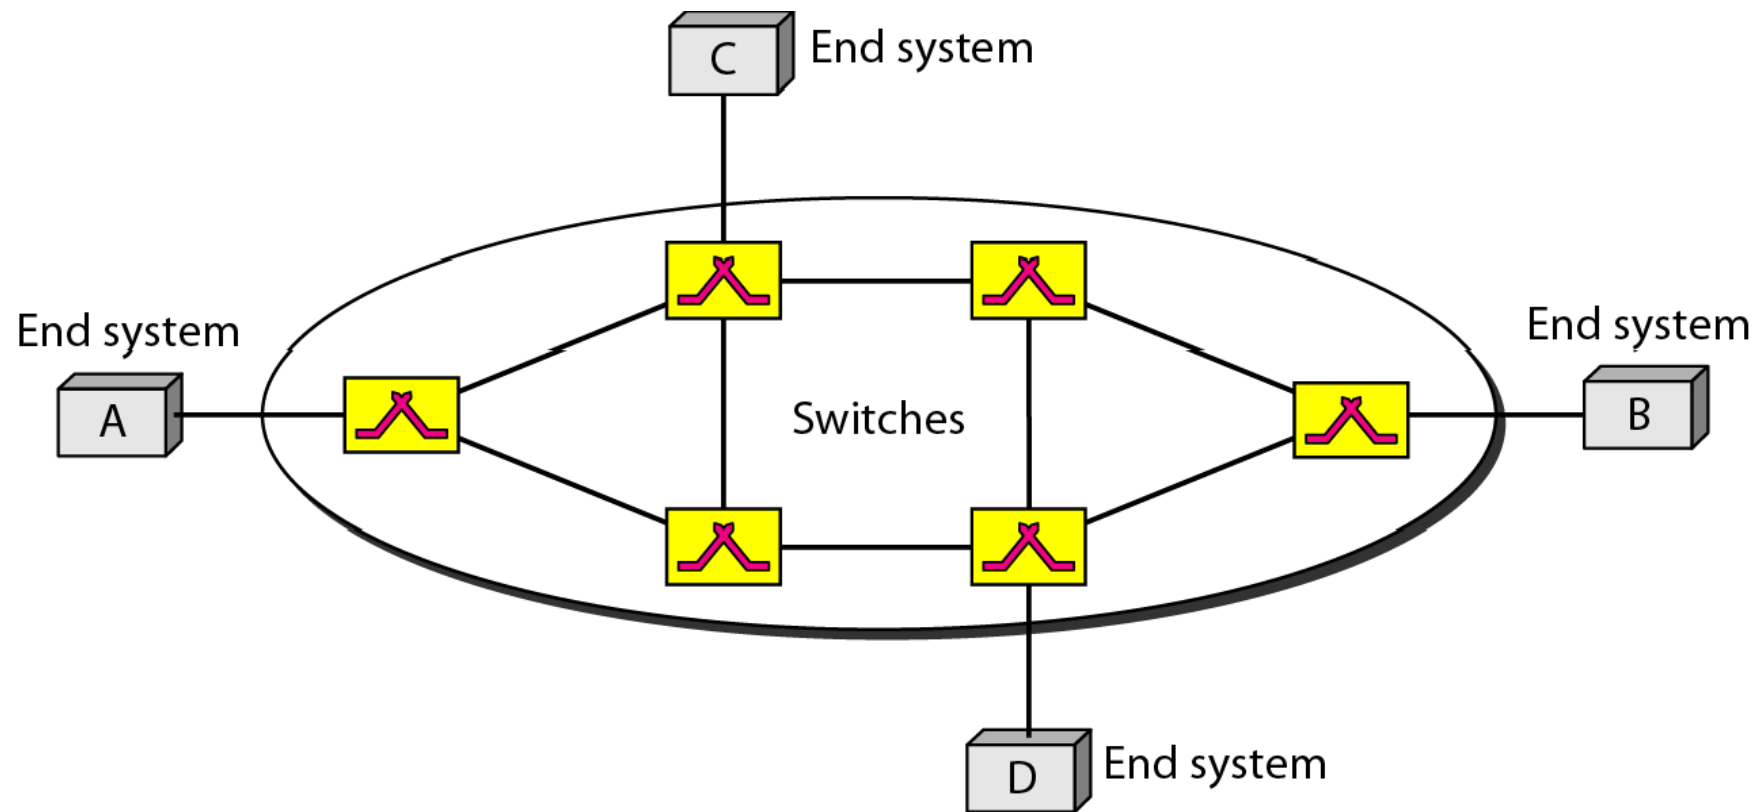

Packet Switching

- **Data Link Layer and Network layer**
- **Store and Forward**
- **uses Pipelining**
- **Efficiency**
- **Delay**
- **Total time = $TT + PD$**

Circuit Switching

- **Physical layer**
- **Contiguous flow**
- **No Headers**
- **Efficiency less**
- **Delay less**
- **Total time = Setup time + TT + PD + Tear down time**

Virtual-circuit network

Delay in a virtual-circuit network
